To Management and the Board of Directors of the Town of Clarence Industrial Development Agency:

In planning and performing our audit of the basic financial statements of Town of Clarence Industrial Development Agency (the "Agency") as of and for the year ended December 31, 2019, in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States, we considered the Agency's internal control over financial reporting ("internal control") as a basis for designing audit procedures that are appropriate in the circumstances for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we do not express an opinion on the effectiveness of the Agency's internal control over financial reporting.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct misstatements on a timely basis. A material weakness is a deficiency, or a combination of deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. A reasonable possibility exists when the likelihood of an event occurring is either reasonably possible or probable as defined as follows:

- *Reasonably possible*. The chance of the future event or events occurring is more than remote but less than likely.
- *Probable*. The future event or events are likely to occur.

Our consideration of internal control was for the limited purpose described in the first paragraph and was not designed to identify all deficiencies in internal control that might be material weaknesses. Given these limitations, during our audit we did not identify any deficiencies in internal control over financial reporting that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

In addition, during our audit we identified matters involving the internal control and other operational items, as well as new reporting requirements that are presented for your consideration. This letter does not affect our report dated March 19, 2020 on the financial statements of the Agency. We will review the status of these comments during our next audit engagement. Our comments and recommendations, all of which have been discussed with the appropriate members of management, are intended to improve the internal control or result in other operating efficiencies. Our comments are summarized in Exhibit I.

The purpose of this communication, which is an integral part of our audit, is to describe, for management and those charged with governance, the scope of our testing of internal control and the results of that testing. Accordingly, this communication is not intended to be and should not be used for any other purpose

## Website Review

On June 3, 2019, the New York State Authorities Budget Office ("ABO") issued Policy Guidance No. 19-01, which summarizes and condenses various sections of New York State Law related to the posting and maintaining of reports on public authority websites. The document is designed to act as a checklist and provides additional references to best practices established by the ABO.

We recommend that the Agency review Policy Guidance No. 19-01 and determine which information is currently lacking on the Agency's website. Additionally, we recommend that the Agency review the various policies required by Policy Guidance No. 19-01 and determine if additional policies need to be adopted by the Board.

## New Reporting Requirements

The Governmental Accounting Standards Board ("GASB") has adopted new pronouncements, which may have a future impact upon the Agency. These should be evaluated to determine the extent the Agency will be impacted in future years.

**GASB Statement No. 87**—The Agency is required to implement GASB Statement No. 87, *Leases*, effective for the fiscal year ending December 31, 2020. The objective of this Statement is to better meet the needs of financial statement users by improving accounting and financial reporting for leases by governments. This Statement increases the usefulness of governments' financial reporting statements by requiring recognition of certain assets and liabilities for leases that previously were classified as operating leases and recognized as inflows of resources or outflows of resources based on the payment provisions of the contract. It establishes a single model for lease accounting based on the foundational principle that leases are financings of the right to use an underlying asset. Under this Statement, a lessee is required to recognize a lease liability and an intangible right-to-use lease asset, and a lessor is required to recognize a lease receivable and a deferred inflow of resources, thereby enhancing the relevance and consistency of information about the governments' leasing activities.

*GASB Statement No. 89*—The Agency is required to implement GASB Statement No. 89, *Accounting for Interest Cost Incurred before the End of a Construction Period*, effective for the fiscal year ending December 31, 2020. The objectives of this Statement are to enhance the relevance and comparability of information about capital assets and the cost of borrowing for a reporting period and to simplify accounting for certain interest costs.

**GASB Statement No. 91**—The Agency is required to implement GASB Statement No. 91, *Conduit Debt Obligations*, effective for the fiscal year ending December 31, 2021. The objectives of this Statement are to provide a single method of reporting conduit debt obligations by issuers and eliminate diversity in practice associated with (1) commitments extended by issuers, (2) arrangements associated with conduit debt obligations, and (3) related note disclosures.

**GASB Statement No. 92**—The Agency is required to implement GASB Statement No. 92, *Omnibus 2020*, effective for the fiscal year ending December 31, 2021. The objectives of this Statement are to enhance comparability in accounting and financial reporting and to improve the consistency of authoritative literature by addressing practice issues that have been identified during implementation and application of certain GASB Statements.
